1.0 Introduction

1.1 Applicability

This guide to Rules and Regulations (“Guide”) is adopted pursuant to the *Articles of Incorporation*, and the *Declaration of Covenants, Conditions, and Restrictions*, (“Declaration”). These documents provide for the establishment of reasonable rules and regulations concerning the use of individual lots and common areas. The Architectural Review Committee (“ARC”) serves as representatives of the Board of Directors (“Board”) while enforcing the Guide. Compliance with this Guide is required, but is not the sole basis for review or approval, nor does it guarantee approval of any application. In reviewing each application, the ARC may consider any factors it deems relevant. Decisions may be based purely on aesthetic considerations. Each owner acknowledges that determinations as to such matters are purely subjective in nature and that opinions may vary as to the desirability and attractiveness of a proposed addition or modification.

1.2 Purpose

This document is not intended to replace the Declaration, but to clarify the process by which homeowners may customize and modify the exterior presentation of their homes and/or lots. The intent is to provide consistent guidance to owners regarding requirements for additions and modifications to property in the community, and matters of particular concern to the ARC when considering applications for approval of such conditions and modifications. Additionally, the Guide sets forth various restrictions on other matters relating to community standards and the overall appearance of property in the community.

1.3 Application and Review Process

Unless otherwise specifically exempted by the Declaration or this Guide, **each and every proposed exterior modification/addition to residential units or lots require prior approval of the Architectural Review Committee.** Submit one copy of the Request for Architectural Approval form to PPM, Inc., 6739 Falls of Neuse Road, Raleigh, NC 27615.

Each application must include a copy of the lot survey showing the size and location of the proposed modification/addition as well as a list and description of the materials to be used. Color samples may assist the ARC in rendering its decision and expedite the review process. The ARC may require submission of such additional information as may be reasonably necessary to consider any application. Review of the application and notification to the applicants shall be conducted as described in the Declaration. Contact the ARC chairperson for status if there is no response within three weeks. Where specifically permitted to proceed without prior approval, such permission shall only be effective so long as the Owner complies with every requirement of this Guide. The ARC is not responsible for ensuring structural integrity or compliance with state and local building codes. Homeowners must obtain all necessary building permits and other government approval that may be required for the proposed modification or addition.

Suggestion: It is strongly encouraged that you share and discuss your ARC plan and request with your neighbors on either side of your property and directly behind or adjacent to your

Townes At Crabtree Homeowners Association, Inc.

property. Their signature on the form only indicates that they are aware and have viewed the planned activities. This may prevent any questions or an objection surfacing after any installation work as been performed.

Important Note: Architectural Review Committee (ARC) approval on landscaping does not constitute engineering approval. ARC Approval is aesthetic in nature. Improvements and consequences are the sole responsibility of the homeowner or person making the improvements. Changes to existing grading and swales are not approved.

2.0 General Architectural Standards

2.1 Antennas, Satellite Dishes (DBS, MDS, DSS)

Homeowners who wish to place a satellite dish on the exterior of the residence are encouraged to submit a *Request for Architectural Approval* to the ARC.

Pursuant to FCC Section 207 of the Telecommunications Act of 1996, the Association will not require prior approval for antennas/dishes in the attic, crawl spaces, garage, or other interior space of the dwelling, or another approved structure so as not to be visible from the exterior of the residence.

Freestanding antennas/dishes (mounted on a pole anywhere on the lot) are **not** permitted.

A maximum of two satellite dishes measuring one meter or less in diameter may be erected on any lot. If installation is required in other than the following approved locations, include a statement from the installer with the ARC application. Standard, approved placement of a satellite dish is:

- Attached to or mounted on a deck or patio in the rear of the residence and extending no higher than the eaves of that portion of the roof of the dwelling directly in front of such antenna; or,
- Attached to or mounted on a deck or patio in the rear of the residence so as to extend no higher than the ridgeline of the residence at a point directly above the position where attached or mounted to the wall.

If installation of the satellite dish antenna meets the foregoing requirements, no ARC approval is required. However, ARC approval is encouraged.
